Spectra Physics Millennia 5

System description:	Spectra Physics Millennia 5i (industrial version with beam expander) Frequency doubled Nd:YVO4 laser system with 532nm TEM00 output, rated 5W, 5.5W max. , water cooled version (better stability). System consists of head, T40 power supply and remote control Additional chiller can be supplied
Laser condition:	Used, excellent condition, about 1000h on system
Performance:	produces >5.5W at rated pump power System is fully tested and performs with spec. or better
